1. Action Requested: None; for information only. Attached is the second semiannual report regarding experiments with flexible and compressed work schedules. Since the time of the previous report in July, only two components have elected to participate in the experimental program. They are listed on the attachment along with the type and length of their alternate work schedule. (U)

2. Several of the components listed on the previous report have found alternative work schedules successful and have extended their participation in the experiment until a final recommendation is made to you as to whether or not we should continue the use of alternative work schedules in the Agency. (U)

3. Your approval on 6 November 1980 of use of the 5/4-9 compressed work schedule in [redacted] cannot be implemented until February 1981. This delay is due to the Office of Finance's need to reprogram the payroll system to accept this popular work schedule. (U)
